DAHLIAS

for 1948

Eighteenth Annual Catalog

Prince of Orange

Grown by

MILLER DAHLIA FARMS

R. C. MILLER, Prop.

13055 24th Avenue South

Seattle 88, Wash.

Speaking of DAHLIAS . . .

It would be difficult indeed to name a flower returning more in colorful blooms over a long season for the time and expense invested in it, than the Dahlia. Through the centuries following its discovery by the Spaniards in Mexico the Dahlia has been of extreme interest to flower lovers and its development to the modern wonderful forms has been a labor of love with countless growers. It is one of the easiest of flowers to grow successfully, and the spectacular showing of colors from early summer until frost, makes the Dahlia plot a prized show place in thousands of gardens. Our customers report from every state in the U. S. A., their pleasure and satisfaction with their Dahlias.

Here on the Miller Dahlia Farms we grow Dahlias with one purpose, to produce the Dahlia stock which will be the best obtainable for our customers. With this in mind, the plants from planting to digging are grown for the strongest possible root development, and nothing is allowed to interfere with this objective. It is a fact that cutting blooms for the cut flower trade requires much foliage to be cut with the blooms thus weakening the roots, so no cut flowers are sold from our fields. It is also considered that over-propagating tends to weaken the stock, so all stock offered is grown from roots alone, and no cuttings or plants are used here. Many a highly advertised and beautiful variety has proved a disappointment in after years, and we believe, this was due to the weakening of the stock by the enormous number of cuttings taken from each root for the purpose of a speedy introduction of the variety, instead of waiting for the normal increase through root multiplication.

From the thousands of varieties now grown, we have tried to select for our customers those which will be representative as to type and colors, and which can be offered at reasonable prices. During the scarcity of Dahlias as well as most all other plant and nursery stock, we have not raised the prices of our stock as many did, and expect to continue to offer our customers at prices they can afford; THE HIGHEST QUALITY DAHLIA ROOTS OBTAINABLE.

POSSIBLE SHORTAGE OF STOCK

It is believed stock is in sufficient supply to fill all orders this year, however, if it seems necessary, the right is reserved to limit the number of roots of any variety to a customer. In case stock is sold out at time of receipt of an order a refund will be sent for the varieties unavailable at the time. Should a sizeable proportion of varieties become sold out before March, a supplement will be mailed to all on the mailing list, showing what varieties are on hand for further orders.

MUCH BEAUTY FOR A SMALL PRICE

ALAMEDA, CAL., JAN. 30, 1947—"I have been growing Dahlias for thirty years and have never contacted a grower who gave so much beauty for such a small price."—L. S.

BEST AND ALWAYS TRUE TO NAME

NACOGDOCHES, TEXAS, JAN. 29, 1947—"This is the 12th year I have bought your Dahlias and find them to be the best I have tried other places, but find Miller Dahlias to be true to name and what you say."—Mrs. D. P. D.

DESCRIPTIONS RIGHT

FRESNO, CAL., JAN. 17, 1947—"The roots that I received last year were everything you say they are. Your descriptions are very right. I am more than pleased."—Mrs. J. R.

CLASSIFICATION—Large varieties of Dahlias are classified for exhibition as “A”—those whose blooms grow 8 inches or more in diameter, and “B”—those whose blooms are more than 4 inches and less than 8 inches in diameter. **MINIATURES** are those under 4 inches and are distinct from the **POMPONS** in that the florets are of the same type as those of the large varieties. These varieties are divided into the descriptive sections as follows: the abbreviations used in this catalog being:

- Formal Decorative—F. D.
- Informal Decorative—I. D.
- Semi-Cactus—S. C.
- Straight Cactus—St. Cac.
- Incurved Cactus—Inc. Cac.

DESCRIPTIONS—Following the name of each variety here, the classification is first given, then the originator or introducer and the year the variety was first offered for sale. The size is indicated next—diameter X depth in inches of the bloom, then the height of the plant in feet. The length of the stem in inches from the first bud or leaf below the bloom is next.

Size and height may vary somewhat with different conditions of soil and culture. The descriptions given are for average blooms and plants as they grow here. Colors may vary somewhat with soil conditions, and occasionally a bloom may sport to some other shade. This is especially the case in Bicolors, where often the plant will throw solid color blooms.

PRICES—are for single root divisions and include Parcel Post charges, packing, etc. The only additional charges are when a small shipment must be sent Express, due to danger of freezing in transit early in the season, or C. O. D. shipments.

VARIETIES OFFERED and RECOMMENDED

- ADORABLE**, I.D., (Angell, 1935,) 8x4-4½'. 11" stiff stems
Blooms facing. Finard yellow with inner florets flesh pink....**25c**

stems. Blooms skyward and facing. Clear yellow, with a slight rosy suffusion.....**25c**

FINE DEPENDABLE STOCK

BURBANK, CAL., MARCH 1, 1947—“This is just a little note of appreciation for the fine stock you sent me. If it would not sound too artificial, I would say that you sent me the finest stock I have ever seen. You are certainly an honest grower of fine, dependable stock.”—J. V. P.

MORE THAN PLEASED

AFTON, TENN., JAN. 20, 1947—I had some beautiful Dahlias last year, I have always been more than pleased with the bulbs I receive from you. The pleasure I received from 2 bulbs more than paid me for the price I had paid for all that I ordered.”—Mrs. R. S.

GUARANTEE—Each root sent out is carefully inspected for soundness and eyes. They are guaranteed to be free of disease and to have one or more live eyes or sprouts, and to be true to name. In the remote case of a variety proving untrue to name a replacement will be made the following spring. Any root considered unsatisfactory by the customer will be replaced or a refund sent on its return within three (3) weeks of its receipt. As the Miller Dahlia Farms has no control over the conditions under which the roots are planted by the customer, no responsibility is assumed for any rotting or failure of the roots after they are planted or used for propagating cuttings. No further obligations than the amount paid for the root is assumed under this guarantee.

HAYWARD, CAL., JAN. 24, 1947—"I have had wonderful results from your stock and many compliments."—J. S.

MILLER DAHLIA FARMS

SEATTLE 88

Betty Hubbard

- BETTY HUBBARD**, S.C. (Armstrong 1939), 10x6—4½'. 10" stiff wiry stems. Perfectly facing. Clear deep yellow. Full bloom, high center, good keeper.....**50¢**
- BLUE MOON**, I. D., (Eastern 1941), 10x5-5'. 15" stiff strong stems. Blooms perfectly facing. Lavender shading to lilac purple at base, giving a bluish effect. Long, heavy florets **\$1.00**
- BLUE RIVER**, F.D. (Salem D. G., 1935), 9x3—4½'. 10" stiff stems. Blooms facing. Bluish mauve, about as close to blue as any Dahlia can come. Long heavy florets in full bloom**40¢**
- BRIGHT EMBERS**, I.D. (Miller D. Farms, 1941), 8x4—4'. 12" straight strong stems. Blooms facing. Rose scarlet, with bright gold shadings at the base of the florets, giving the effect suggesting the name. Excellent substance therefore a splendid keeping flower when cut. Very profuse.....**40¢**

Bright Embers

"The Highest Quality Dahlia Roots Obtainable"

Darcy Sainsbury

- CARL G. DAHL**, I. D., (Hillcrest 1937), 10x4-4'. 14" strong stems. Blooms facing and skyward. Apricot buff shaded old rose75c
- CHARLES L. MASTICK**, F.D. (Tyler, 1937), 9x5-4'. 12" straight strong stems. Bright orange with pink reverse. Full bloom, excellent cut flower.....35¢

P

LIKE HAPPY, WELL FED CHILDREN

CARLSBAD, CAL., JULY 29, 1947—"I have had, and still have such glorious blooms from your stock that I wanted to tell you about them. I doubt if Mayor Otis could be surpassed for size, and certainly not for coloring, tho Forest Fire tries to give it competition as to coloring, but not size. Anything you say about your Dahlias is a rank understatement, quote me as saying so: healthy and vigorous, they remind me of happy, well fed children, for to me they are people, I've had beauty and joy from every one of them.—Forgot to mention that I am expecting a lot from your seedlings, from that last packet of seeds, little plants fairly popped out of the flower pots I had them in." —Mrs. Jane Troxel.

CHULA VISTA, CAL., JAN. 27, 1947—"It is a pleasure to purchase stock from you as your bulbs are always O. K."—C. A. S.

"The Highest Quality Dahlia Roots Obtainable"

Katie K.

- KATHLEEN NORRIS**, I. D., (F & M 1929), 10x5-4'. 14" heavy stems. Blooms usually facing. Bright rose pink with lighter shadings25c
- KATIE K.**, I. D., (Lakeside 1938), 10x4-3½'. 18" straight strong stems. Blooms facing. Violet rose, lighter shadings. Full blooms with excellent substance.....85c
- KENTUCKY SUN**, F.D. (White, 1933), 8x5—4'. 12" strong, straight stems. Blooms perfectly facing. Clear lemon yellow. Very symmetrical florets of good substance, and produces quantities of splendid keeping blooms.....15¢
- LA DOSKA DOWD**, I. D., (Western 1926), 7½x4-4½'. 12" wiry stiff stems. Blooms facing. Deep yellow with a touch of rose pink on the outer florets. Narrow curved florets..... 15c
- LADY MOYRA PONSONBY**, I.D., (from England 1935), 10x5—4'. 14" strong straight stems. Blooms perfectly facing. Light yellow. Full blooms, heavy bush growth..... 30¢
- LE MOYNE STRATTON**, F. D., (Miller D. Farms 1941), 8x5-4'. 8" strong stiff stems. Blooms facing. A soft shade of light apricot, or champagne, deeper center. Full bloom with florets of excellent substance..... 35c
- LUCKY**, St.Cact., (Schutte 1945), 7x4—4½'. 10" wiry stiff stems. Light red. Extremely early and profuse. Have counted 35 perfect blooms on a plant at one time. Unexcelled as a florist's Dahlia.....\$1.00
- LUSCIOUS**, F. D., (Miller D. Farms 1946), 10x5-3'. 14" strong stems. Blooms facing. Light apricot buff, leathery foliage.....60c

FOOT HIGH PLANTS MOVED SUCCESSFULLY

FRESNO, CAL., JAN. 24, 1947—"The address is changed from that of the past two years that I have bought Dahlias from you. I had to dig my Dahlias when they were about a foot tall, and in spite of that I really had some beauties.—Mrs. W. G.

"The Highest Quality Dahlia Roots Obtainable"

Mrs. George le Boutellier

- MRS. GEORGE LE BOUTELLIER**, I.D. Ruschmohr, 1935), 10x5—3½'. 15" heavy stems. Blooms normally facing, but sometimes too heavy growth will cause drooping. Deep carmine red, a brilliant rich color on a most spectacular bloom. Leathery foliage, dark stems.....**20¢**
- MRS. HERBERT O'CONNOR**, St. Cact., (Dahliadel 1936), 8x4—4'. 15" wiry stiff stems. Blooms all facing. Bright rose pink shading deeper at center. Profuse, good keeper.....**50c**
- OAKLEIGH MONARCH**, I.D. (Oakleigh, 1936), 9x6—3½'. 10" heavy straight stems. Blooms perfectly facing and uniform in size and form. Brilliant clear carmine red. The florets are wide and heavy making a full bloom. Cert. of Merit.....**30¢**
- OPALESCENT**, I. D., (Miller D. Farms 1940), 10x7x6'. 15" straight stems. Blooms sky-ward and partly facing. Chrome yellow shading to pinard yellow, flesh color and carrot red on outer florets, reverse streaked Alarizine pink, old rose and yellow. Profuse.....**60c**
- PALE MOON**, F.D., (Miller Dahlia Farms 1941), 6x4—5'. 8" stiff stems. Blooms facing. Soft light yellow, unshaded. Early and most profuse. Splendid variety for cut flower work**25¢**
- PASSION**, F. D., (Miller D. Farms 1946), 9x4-3'. 15" stiff strong stems. Blooms facing. Rich deep velvety red. Broad florets of excellent substance.....**75c**
- PATTY WAUGH**, F.D., 6x3—4'. Stiff wiry stems. Blooms perfectly facing. White. Profuse, early and a splendid cut flower**40c**

GREW SO RAPIDLY

WOODLAND, WASH., JAN. 7, 1947—"I'd just like to tell you how pleased I was with your tubers. I've never bought tubers that were so firm and grew so rapidly. And you sell them so reasonable. The flowers were superb. This year I am ordering more and wish I had room for every one in the catalog."—Mrs. A. O. S.

A JOY TO ALL

PACIFIC BEACH, CAL., JAN. 20, 1947—"Your Dahlias have always come to more than my expectations and have been a joy to all who come to my garden."—Mrs. F. T. S.

PRIZE OF THE NEIGHBORHOOD

TACOMA, WASH., FEB. 21, 1947—"Last year I ordered some Dahlias from you and they were the prize of the neighborhood, just gorgeous, tall and large. Also ordered some from another place that were terrible. Throwing them away this year."—Mrs. A. L. S.

Sophisticate

Snow Pillow

SPRINGTIME, I.D., (Miller D. Farms 1944), 7x3—4'. 9" stiff wiry stems. Blooms perfectly facing. Unusual combination of light peach pink shaded cream, with bright yellow central florets. Very early and profuse, and a splendid keeper50c

SULTAN OF HILLCREST, F. D., (Scott 1933), 9x5-3'. 12" heavy straight stems. Blooms facing. Yellow, with faint touches of rose, and rose reverse. Full bloom.....35c

Springtime

"The Highest Quality Dahlia Roots Obtainable"

Willie B. Hill

- THE COMMODORE**, I. D., (Kept 1932), 10x6-3½' 12" strong stems. Blooms facing. Solid unshaded yellow. Profuse..... 10c
- TOWERS EMPIRE**, I.D., (Parella 1935), 9½x6—5½'. 10" straight strong stems. Blooms skyward and facing. Very bright golden yellow slightly tinged delicate rose at center. Long heavy florets in a heavy bloom..... 50¢
- VOLGA RIVER**, I.D., (Feldman 1942), 10x5—4'. 15" straight strong stems. Perfectly facing. Bright scarlet with lemon yellow center and stripes running up into the florets. Full massive bloom. Early and profuse..... 60¢
- WANDA MILLER**, F. D., 7x4-4'. 12" stiff wiry stems. Blooms facing. Violet tipped white.....25c
- WARRIOR**, F. D., (Miller D. Farms 1946), 9x4-4'. 16" stiff stems. Blooms perfectly facing. Bright scarlet. Broad florets somewhat twisted.....75c
- WHITE GOLD**, F.D., (Miller D. Farms 1944), 8x4—3½'. 15" straight stiff stems. Blooms facing. Rich creamy white or very light yellow. A full bloom, with good keeping qualities and profuse.....50c
- WILLIE B. HILL**, S.C., (Miller D. Farms 1945), 10x3—3'. 10" straight stiff stems. Blooms skyward and partly skyward. Light glowing crimson. Full high centers. The unusual lacy attractive foliage with the large delicately colored and formed blooms make this variety a "must have" with all who see it.....\$2.00

STOCK VERY SATISFACTORY

BEAUMONT, TEXAS, JAN. 22, 1947—"Our climate is not the best for Dahlias on account of heat and humidity. Country has 80 inches of rainfall. I have purchased from you for several years, and your stock is very satisfactory."—C. S. S.

NOTHING LIKE THEM

PATTERSON, CAL., FEB. 19, 1947—"I have had wonderful success with bulbs that I have bought from you in the past. Have never had Dahlias like those raised from your bulbs. Thanks so much."—A. W. H.

Winter Wonderland

- WINTER WONDERLAND**, I.D., (Miller D. Farms 1947), 8x4—3'. 8" stiff stems. Blooms perfectly facing. Creamy white with slight overcast of pink. Profuse and early, and a splendid keeper.....\$1.00
- WISTERIA**, F. D., (Miller D. Farms 1945), 9x5-4'. 16" stiff stems. Blooms facing. Clear deep orchid. Full blooms, good substance.....40c
- YOUR LUCKY STAR**, S. C., (Amer. D. Farms 1939), 9x4-4'. 12" straight strong stems. Blooms facing. Amaranth pink, central florets white. High centers. Profuse and a good cut flower 50c

REGARDING DATE OF SHIPMENT

Roots may be ordered at any time and will be shipped at any date desired by the customer. However, it is advisable to have them sent not too long before the time for planting, as no Dahlia grower can be responsible for any loss which may occur on account of spoiling or drying out of roots which are in the customers' hands for a month or so before planting. And where early orders are used for forcing for the purpose of making cuttings to plant, there is no guarantee against rotting of the roots in this process. In sections where the spring is backward and the ground is still cold and wet in May, it is advised to keep the roots in the peat moss in which they are packed, and they will sprout nicely with hardly any attention, so when the ground is warmed up the new plant will have a better start than if it had been put in the ground earlier. Parcel post charges are all paid by me, and express charges on large shipments, but where small orders are wanted sent during weather when freezing might occur in transit, the shipment will be made express, charges collect.

"The Highest Quality Dahlia Roots Obtainable"

A Group of Miniature Dahlias

MINIATURE DAHLIAS

- BABY ROYAL**, Min. S. C., Salmon pink, mostly open centers....20c
BARBARA DOANE, S.C., Light pink, lighter shadings and center. Low bush..... 25¢
CARLOTTA, Min. F.D., Light carmine red, narrow folded florets, each daintily notched at end. Good stems, tall, and a florist's favorite.....15¢
EASTER BONNET, Min. F. D. Small salmon buff with golden center. Early and profuse. Tall bush.....25c
ELIZABETH PAPE, St.Cact., Rosy salmon pink, light tips..... 25¢
ESKIMO BELLE, F. D., White, small blooms, profuse..... 30c
FAIRY, Min. I.D., Salmon pink, florets attractively curled.....20¢
FIRST LOVE, (New) I. D., 5" blooms of true pink with bright yellow base and stripes. Narrow gracefully curled florets .. 50c

A BEAUTIFUL SIGHT

SANTA CRUZ, CAL., JAN. 20, 1947—"Well its needless to say I like your Dahlias, for here I am again. I use them for cut flowers in my shop, and everyone raves over my collection. I have about 75 varieties of Miniatures and Pompons, and last year they were a beautiful sight."—Mrs. O. E. S.

WELL SATISFIED

MILWAUKEE, WIS., FEB. 17, 1947—"The roots I received from you last year certainly did produce some wonderful Dahlias. I am well satisfied with your stock."—G. J. M.

MINIATURE DAHLIAS

GOLDEN SUNSHINE , Min. St. Cact. Pink, with bright gold center. Very profuse. Large bloom and tall bush.....	25c
LITTLE NEMO , Min. F. D. Scarlet, more or less tipped white. Narrow folded florets.....	20c
LITTLE PAL , Min. F.D., Small orange and white, good stems, low bush.	15¢
LITTLE SNOW QUEEN , Min. S. C. Pure white, almost a Straight Cactus.....	25c
MARJORIE EMBERSON , S.C., Glowing rose pink. Low bush. Early.	25¢
MAUDE ADAMS . Ball, white, delicately shaded lavender.....	25c
MAUVEEN , St.Cact., Light lavender. Low bush. Early and profuse.	25¢
ORCHID LADY , F.D., Light lavender or orchid.....	25¢
PINCUSHION , Min. Ball. Brick red.....	15c
RED SAIL , St.Cact., Brick red. Very early and profuse. Tall....	20¢
RUBY RING , Min. F.D., Dark Red, profuse.....	25¢
SNOWBALL . Ball. Creamy white. Tall bush.....	20c
SOUTH SEAS , I.D., Orange, shading to peach pink.....	20¢
STOPLIGHT . Min. F.D., Small dusky red. Profuse, tall bush....	25¢
VERITY WADSWORTH , Min. F. D. Soft bright yellow. Tall bush	30c

A GARDEN OF NEW VARIETIES THIS FALL FROM SEEDS

More and more of our customers are experiencing the fascination of originating their own varieties of Dahlias by planting our seeds. The Dahlia does not come true to name from seeds, this is the way new varieties are produced. It is truly interesting to watch the new blooms unfold from a planting of Dahlia seeds, and many times a distinct worth-while new variety will be obtained, which may be named by the grower. We offer three types of seed, Large, Miniature and Pompon, at prices indicated. These will usually produce Dahlias the same types as the seeds, but of a wide range of color combinations. While these seeds are tested for high viability, no guarantee can be given for them. Full directions for planting, etc., printed on each package.

DAHLIA SEEDS

Pompon or Miniature Dahlia Seeds per packet of over 25 seeds.....	25c
Large Dahlia Seeds per packet of over 25 seeds.....	50c

ENJOYMENT FROM SEEDLINGS

BELLFLOWER, CAL., JULY 30, 1947—"Just a line to tell you about my Dahlias from a packet of your seeds. They are large and deep, and no two alike. I shall enjoy them very much. I have 15 plants." Miss A. E. E.

WONDERFUL SUCCESS IN ILLINOIS

GREENUP, ILL., MARCH 24, 1947—"We do have wonderful success with the bulbs we get from you. They seem to grow exceptionally well here in Illinois."—Mrs. C. H.

THE BEST ADVERTISEMENT

TYLER, TEXAS, JAN. 28, 1947—"Have talked your Dahlias, price, quality, etc., as well as exhibited what I have grown from your Farms for 9 years—hence the new customers. 'A satisfied customer, the best advertisement one can have.'—Mrs. G. E. R.

"The Highest Quality Dahlia Roots Obtainable"

POMPON DAHLIAS

Pompons, per root.....15¢

- AIMEE**, Small orange, shaded apricot.
ALICE ROCKWOOD, Old rose, large blooms, tall.
ALLBRIGHT, Large yellow, heavily tipped crimson
ALLEN H., Light pink, flushed cream.
AMBER QUEEN, Light orange, or amber.
ATOM, Small orange
BANTAM, Bright light scarlet, tall bush
BARBARA, Light lavender pink with white center. Very regular, with dark foliage. Tall bush.
BLUE DOT, Deep lavender, extra good stems.
BRUNETTE, Deep red
CELESTIA, Pure white, with exceptionally good stems.
CHICKIE, Old rose. Very small, tall bush.
CLEO, Orange, shading deeper at tips.
COQUETTE, (new) Rich creamy yellow base, shading to bright scarlet with an occasional white floret. Variegated
CORAL GLOW, Old rose, shaded old gold.
DEE DEE, Light lavender
EDITH MUELLER, yellow, tipped carmine.
ELVINA, Scarlet and orange, more or less variegated.
EUNICE, light lavender and white. Tall bush.
EUREKA, Light orange, tipped scarlet, some white florets.
FLAME, Deep red, medium bush.
GEO. IRELAND, Light purple. Small.
GERTRUDE. Oriental red. Low bush.
GOLDIE, deep yellow. Large.
HAZEL DELL, Clear pink, edged cerise.
HELEN ANITA, Lilac with white central florets.
HELEN LAMBERT, Large deep yellow, double florets
IOLANTHE, Salmon scarlet. Large, Tall bush.
JOE FETTE, White
JOSEPHINE, Purple, low bush.
LEMON DROP, Light yellow. Small.
LETA, Large bright red
LITTLE DAVID, Russet orange, nearly red.
MARY MUNNS, Large light purple
MORNING MIST, Light lavender pink, shaded white. Low bush.
NERISSA, Small bright pink
PEGGY ANN, Yellow, shaded brownish red. Tall.
SAN TOY, White, heavily tipped carmine. Large.
SNOW FLAKES. Large white.
SPECKLES, Deep red and white, variegated.
TAKAS PURPLE. Violet purple. Tall bush.
TAKAS YELLOW. Bright deep yellow.
TIMID. Bright red. Low bush.
TOM THUMB, Light red, very small.
TOTO, Deep maroon, large. Tall.
TONY, Deep yellow. Bushy plant.
VANIRA, Bright pale yellow, lightly tipped carmine.
YELLOW GEM, Canary yellow.

A HARVEST OF BEAUTY

OAKLAND, 11, CAL., JAN. 22, 1947—"The Dahlia tubers bought from you over several years have yielded such a harvest of beauty that they have indeed, been a 'Joy Forever' and it has been a great satisfaction to be able to recommend your Dahlia stock to numerous friends"—Mrs. G. L. S.

ATTRACTED LOTS OF ATTENTION

MITCHELL, S. DAK., JAN. 27, 1947—"We had very fine Dahlias from your bulbs last year. They attracted a lot of attention because Dahlias are not so plentiful here."—J. J.

DAHLIA CULTURE

For the healthy growth and the lovely blooms your Dahlia planting should be expected to produce, just a few simple requirements are demanded. These are easy to understand and follow when we consider the manner in which the Dahlia plant grows.

The root division which we plant has an eye near or on the part of the stalk which forms the top of the root. This eye contains the really important part of the entire root, and from it a stalk and feed roots grow to form the Dahlia plant. The rest of the root is merely a dinner basket to supply the necessary nourishment for starting the new plant. As soon as the feed roots, very fine at first, reach the point where they start to supply enough plant food to enable the newly-formed leaves above ground to begin work, the original root has performed its purpose, and may as well be disregarded. In proof of this, the root you plant may be cut in half or a still smaller portion be planted with a resultant vigorous plant, providing the conditions of soil and moisture, etc., are made right.

Thus the new plant needs nothing in the way of fertilizer or irrigation until the new feed roots are established. And the more numerous and faster-growing these feed roots, the stronger the plant and the better crop of roots for the next year. Any fertilizer should for this reason, not be placed in the hole in which the root is planted, but spread over the entire Dahlia plot, as the new roots will cover in most cases the entire space allotted to your Dahlias.

Some of these new roots will thicken and begin to store up starch and other food elements, forming the new crop of storage roots. It is when these are growing and the buds on the plant are beginning to open that plenty of plant food and water are necessary. It is known that one bloom in its formation requires many times the water and food that is needed for the foliage and stalk growth.

It is clear anything which tends to interfere with the growth of these new feed roots will stunt the growth of the plant, so an over-supply of water at the start, or the presence of rotting vegetation or manure, anything which will cause these roots to rot before they reach a healthy growth, is to be avoided. Plenty of room is needed for root development and space between plants should be enough for good ventilation to avoid mildew of the foliage.

With an understanding of these requirements, we can plan the best way to plant and care for the Dahlias.

The soil should be loose and well drained. Spading deeply as soon as the ground can be worked in the spring is a necessary part of preparation. On heavy clay soil some sort of humus should be worked in, and some sand or fine coal ashes. If new clay, a dressing of agricultural lime raked in the surface after spading will be of advantage. If the ground has been planted to a root crop the year before an application of bone meal and potash should be made, and this worked into the surface before planting. About 5 pounds of bone meal and 1 pound of Muriate or Sulphate of Potash to every 10 plants.

When the soil has warmed up nicely, and not until then, is the time to plant. **DO NOT PLANT A DAHLIA ROOT IN COLD, WET GROUND**, and expect anything but failure. Some varieties may pull through, but nothing is gained by planting too early. A hole about 5 inches deep in heavy soil, to as deep as 8 inches in light sandy soil, is dug for each root, and allow at least 3 feet each way between holes. This for the large varieties. The Pompons may be spaced closer, also the miniatures for mass effects. A stake should be driven close to the hole and the root laid therein with the eye or sprout facing up, and toward the stake. The root should be covered about two inches, and the hole gradually filled in as the plant grows. It may be tied to the stake with soft twine or rag to avoid cutting the stalk.

For a bushy plant with numerous blooms the plant may be pinched out after the 3rd set of leaves forms. This will force the buds at the base of the plant to develop and the plant will spread out. For large blooms, pinch out the buds on each branch down to the base buds leaving only one bud to a stalk. This

"The Highest Quality Dahlia Roots Obtainable"

allows long stems for cutting or exhibition. As Pompons and Miniatures are somewhat valued in inverse ratio to their size none of these should be disbudded, but the young plant may be pinched out to make more blooms.

There are a few insect pests which may infect your Dahlias, depending on your locality. Aphis or other sucking insects, or leaf hoppers or other chewing insects. There are a number of good sprays and dusts on the market, including the new DDT which may be used according to directions on the package. Your local feed store or hardware dealer will help you select whichever is indicated by your local conditions.

The ground around the Dahlia plants should be kept in a loose condition by frequent cultivation, deep at first and then shallower as the plant grows and the feed roots spread out, and near the surface. If your summer is very hot, a mulch between the Dahlias of grass clippings, or other material, will help keep the ground cool and avoid overheating the roots. During extreme heat it is advisable to pick off the buds and not allow blossoms to form, thus saving any possible dangerous wilting of the plant.

When watering, after the buds have started to open, and not until then, it is better to give the ground a thorough soaking once a week or every ten days, than to sprinkle the surface every day. The moisture should reach down about a foot to be of the most value.

Dahlia blooms should be cut either early in the morning before the sun starts to dry them out, or late in the evening. The best method of cutting for long keeping blooms, is to carry a bucket of cold water into the garden and plunge the stem of the Dahlia into it as soon as it is cut from the bush. A knife should be used instead of scissors, as the object is to not press the stem shut, but rather leave it so that it will absorb water readily for the bloom. The cut flowers should then be placed in the cold water container, in a cool dark place, and away from any drafts, for several hours, or if cut in the evening, over night. After that they are ready for placing in your vases or other containers for display, and will keep much longer than if any other method of preparation is used. Too much foliage left on the stem will greatly lessen the keeping quality of the bloom.

After the first killing frost the Dahlia clumps should be dug and stored for the winter. If the sections where there is no frost, or where it comes very late in the year, the plants may be cut down any time and after allowing a few days for the sap to go down into the roots, the clumps may be dug and cared for the same as if they had been killed by frost. It is well to dig the dirt away from the clump and cut down with the spade all around it rather deep before lifting it out. This will cut the feed roots which may extend out as far as two feet from the stalk, and which might break some of the roots from the stalk if not cut. Any roots which are broken at the neck will probably not be any good the following spring.

The clump may be allowed to stand for a while to dry out the dirt, which may then be shaken off gently. Or a gentle stream of water may be used to wash the clumps. The stalk should then be cut off close to the clump, and it is then ready to be divided or stored.

A cool not too dry cellar is the best place for root storage, being sure it is frost proof. It does not need much below freezing to ruin Dahlia roots. Also, dry warm air will cause the roots to dry out and shrivel up, so that most of them will not grow in the spring.

In dividing the clumps, all that is necessary is to have an eye for each root saved, and these eyes are plainly visible at the time of digging, if one wishes to divide them then. This will do away with the possibility of stem rot, which sometimes spoils the entire clumps. Cut surfaces may be dusted or dipped in powdered lime or sulphur and the roots packed in boxes of fine sawdust, or even dry dirt. The name of the variety may be written on the root with an indelible pencil, moistening the surface so the writing will be permanent. This avoids the possibility of lost tags and mixed-up varieties.

Any special problems not covered will be gladly considered on request, and all available information thereto will be given.
